

# Blood

## Red Blood Cells (erythrocytes)

Red blood cells transport oxygen and carbon dioxide to and from the cells.

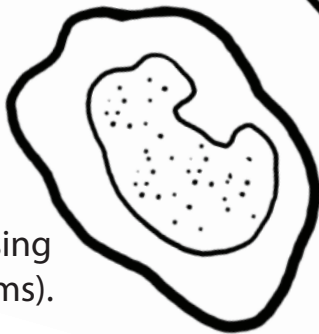

blood vessel

## White Blood Cell (leucocytes)

White blood cells identify and destroy pathogens (disease-causing microorganisms).

## Platelets (thrombocytes)

Platelets are involved in blood clotting, and repair and regeneration of connective tissue.

# Awesome Anatomy Blood & Blood Vessels Instructions

## Day 1 (Minimum Requirement)

Use crayons to color in the Red Blood Cells, White Blood Cells, and Platelets. Use a different color for each type of blood Cell.

---

## Day 2 (Minimum Requirement)

List three different Veins

List three different Arteries

What is the difference between a Vein and an Artery?
